MELLICTA AB

Product development

Product Development:

- UX/UI
- Hardware
- Software
- Concept/ Services

If there is need for a product development in your company but your resources are limited, Mellicta can handle the process from idea to finished product.

As experts in product development processes, we make sure to validate the project as well as handle the technical aspects of the development.

With these types of projects, we use a project-based payment system.

MELLICTA AB

Our process

1. Need and context analysis:
Understanding the need and market around the company

2. Target solution:
Finding the best solution to advance the company in the right direction

3. Implementation of solution:
Development and implementation of custom-made solution

4. Upkeep and further development:
Service and support of current solution and evolvement for new needs

MELLICTA AB

The Team

Mikael is the founder of Mellicta, with 35 years of experience spanning advanced system design for machine-vision platforms, embedded software engineering, and product security.

Over the last 15 years, he served as a trusted technical expert addressing the enterprise cybersecurity needs of a major company, shaping solutions that protected products and infrastructure at scale.

At Mellicta, Mikael applies this depth of hands-on engineering and security expertise to deliver robust, secure products from concept through deployment, combining rigorous design with practical execution

Mikael Eriksson– founder and CEO

Ellinor is a driving force in E mobility and energy infrastructure with several years' experience turning innovation into business value. She studied an M.Sc. in Design Engineering from Luleå University of Technology and has served as both project and development manager.

Combining technical expertise with business development, she has delivered projects in smart housing, IoT, and integrated energy systems, from smart charging for private users to robust solutions for heavy traffic, while advancing battery storage innovation.
She also has strong knowledge of state funding processes, having prepared successful applications and secured funding from multiple national and international sources.

At Mellicta, she advises companies on business and product development and leads funding processes to meet company needs.

Ellinor Eriksson– Manager of market and innovation
